

Get ready for the ultimate Flying Fun !

- Enjoy all-around unmatched visibility
- High lift fowler flaps to minimize take-off and landing speeds
- Good climbing characteristics allowing short takeoffs and landings
- Generous payload and storage volume for travelling
- Versatile flying fun such as:
 - Sight-seeing
 - travelling
 - Mountain, glacier and water landing
 - Stressed for basic aerobatics
 - Sailplane towing

Smart Design

- Central engine location providing optimal visibility for the crew
- Fast de-/rigging of wings, elevator and landing gear to allow easy transport, storage and maintenance
- Interior with a high level of ergonomics like modern cars

Encounter the New Generation Aeroplane !

State of the Art in Safety

Active and passive safety features:

- All-around visibility for VFR flight
- Low speed flying capabilities
- Responsive controls but forgiving flight characteristics
- Easy spin recovery
- BRS system (Ballistic Rescue System)
- FLARM (anti-collision GPS)
- Engine fire extinguisher

High-Tech

- All carbon composite structure
- Modern catalysed engine allowing long range and low fuel consumption
- Data processing management coupled with GPS to assist the pilot during flight planning, cruise and navigation
- Foreseen Head up display - HUD, integrated and removable
